

JUMP INTERNATIONAL PROFILE

2015 - 2017

Jump association and the C.T.E. Closer To Europe consortium

Jump cultural association was born in 2012 thanks to the will and the expertise of a team of experts working in the field of Euro-project management. Jump has a precise mission: bring European opportunities and development through training, mentoring and networking.

After 3 years and reaching the first milestones (2 main European projects involving schools and young people, the first Euro.Soul Festival to celebrate Europe's birthday, a monthly regular newsletter and a very active website), Jump founded the C.T.E. Closer To Europe consortium of partners working to improve people's skills and competences in European Project Management.

Since 2015 the main activity of our team is the organization of trainings in Italy at different levels:

- intensive courses on European project design and management for unemployed people, workers, teachers and interested participants;
- teachers training on European technics for teaching and improve the quality of the educational system;
- international trainings financed by Erasmus Plus KA1 on different topics.

C.T.E. will become a specific company in 2016 aiming at widening the range of opportunities to apply for grants, networking and exchange of practices. The main project with which C.T.E started to be developed is the EU ClusTEr Network, the first Pan European Network of partners working together to empower the knowledge of Europe and its financial programs.
